AQUASHIELD RAIN GUTTER

SYSTEM ACCESSORIES

BASIC COMPONENTS

RAIN GUTTER :

This is a narrow channel or through, forming the component of a roof system which collects and diverts rainwater shed the roof.

RAIN PIPE :

Water collected by a rain gutter is fed usually via a rain pipe from the roof edge to the base of the building where it is either discharged or collected.

FEATURES OF OUR RAINGUTTER

- Light Weight and does not dent, rust, rot, peel or become brittle
- Self aligning design ensures accurate installation
- Suitable for any type of extreme climates
- Requires minimum or no maintenance
- Entire range of accessories are available
- Can withstand water drain speeds up to three times that of normal gutter
- Easy to cut and install.

UPVC ,ALuminium Rain Gutter
